WORK EXPERIENCE

Full Stack Web Developer

May 2023 – Present

Fayetteville, AR

Developed custom web solutions using the React tech stack, with a focus on client collaboration and innovative problem-solving. Successfully completed projects for churches, including both frontend and backend development tailored to their unique needs.

- Key Projects:
 - moreofgrace.org – Fullstack React SPA.
 - Delivered a refreshed React.TS design to boost visitor engagement and attendance.
 - Built an intuitive, responsive layout optimized for all device sizes.
 - Developed a Node.js/Express backend for data management and API integrations (Google Cloud Storage, Mailgun.js).
 - Created a secure admin suite for content management with OAuth authentication.
 - Optimized for SEO, including labeled HTML tags, a sitemap, and updated the church's Google Business card.
 - ffwbcw.org – Static React SPA
 - Delivered a lightweight, traditional design to meet the needs of an elderly congregation, integrating ChMeetings for seamless church management and Email.js for serverless contact.

Springdale Public Schools

Aug. 2023 – Present

Building IT Technician

Springdale, AR

Provided hands-on technical support for students and staff, troubleshooting and resolving issues with various technologies. Managed IT assets, conducted inventory audits, and communicated solutions to teachers to ensure smooth classroom operations.

- Resolved hardware and software issues, escalating complex problems when needed.
- Set up and configured Windows laptops and Chromebooks for optimal performance.
- Communicated solutions and prevention strategies to teachers.
- Managed service requests through a ticketing system.
